

## Bring Learning to Life with Immersive Experiences

We've combined instructional design and the latest AR and VR technology to create new learning possibilities for your organization. Building upon your learning objectives, we create a fully digital reality or augmented environment that trains your users by simulating real-life experiences. Immersive experiences can reduce the cost of training and enhance safety and efficiency all while building a smarter, more skilled workforce.

---

Immersive learning provides a safe space to try new techniques, encounter true-to-life scenarios, and make mistakes — all in a controlled, virtual environment. Our goal is to provide a customized, effective, and engaging experience that drives performance and makes a lasting impact.

---

Customizable analytics that capture completion and interactions within the experience

Incorporates 360° interactive/passive video, photographs and 3D modeling to create a fully immersive experience

Can be deployed on multiple platforms, including PC/MAC, tablet, phone, web browser, Oculus Go, Oculus Rift, HTC Vive and more

Development from conceptualization to deployment, and all files remain the property of the client

Trusted partner to plan and demonstrate effective use cases and AR/VR applications for your organization

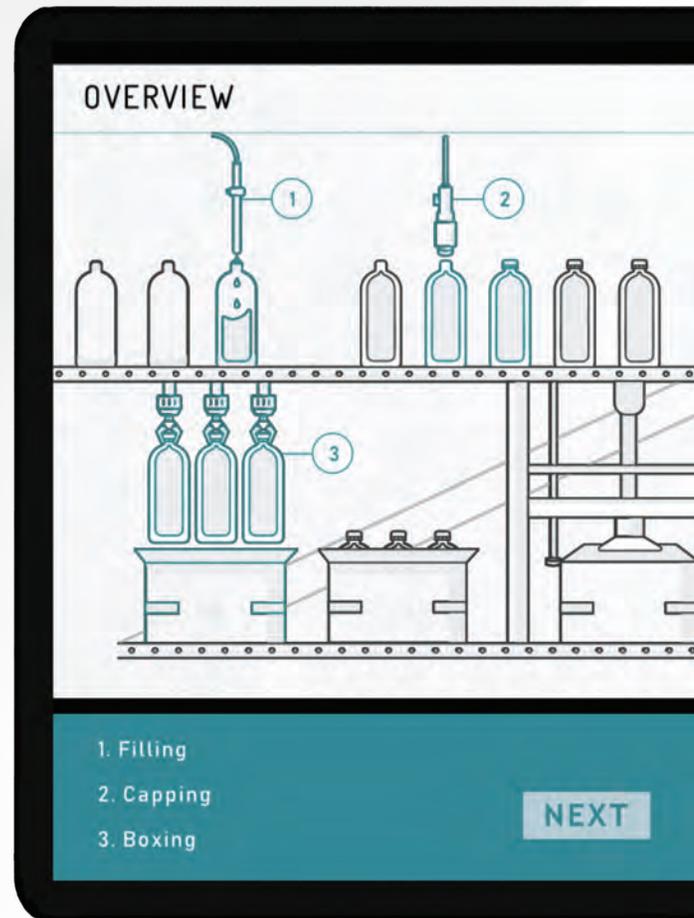

Strategic resource to help incorporate immersive experiences into your existing learning strategy

# Roundtable Services

While we love to build a solution start-to-finish, we understand that sometimes you just need one piece of the full package. We can step in as an extra hand to help your team with learning strategy and concept, or we can get to work on an eLearning script while your team handles the rest. Or, we can save you time by refreshing and republishing your existing content.

Let our team make your life easier by augmenting your staff and delivering the learning strategy and solutions that you don't always have time to create in-house.

# Custom Content that Enhances your Learning Vision

---

Informed by your SMEs, we'll create content that brings the best out of all your employees. No matter your industry, and no matter the skills and behaviors you want to teach, our content team approaches your project equipped with the principles of eLearning, video learning, ILT, blended learning, microlearning, and social learning. You bring the raw information, and our instructional designers, videographers, writers, and voice actors transform it into the training you need.

---

Solutions for eLearning, blended learning, video learning, AR/VR, ILT, and more

Courses engage learners using gamification, microlearning, branched learning, scenarios, and other learning strategies

In-house team of writers, instructional and graphic designers, voice actors, software developers, and more

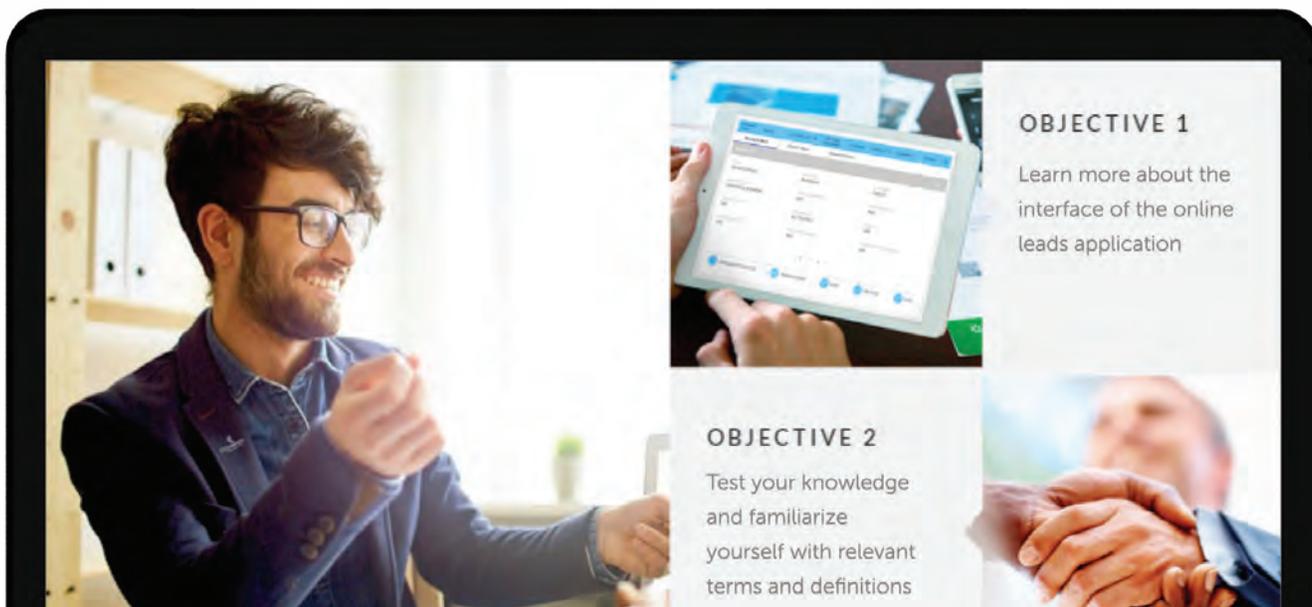

20 years of experience in custom content and LMSs, ensuring that our courses will work in any LMS

Proven course development process includes regular sign-offs and client meetings to ensure timely delivery

A direct line to your client services representative and a transparent view into our proven development process

# Why Partner with Roundtable Learning

---

Our mission is to create learning solutions that empower your learners, reflect your brand, and create a culture of continuous learning in your organization. When you work with us, your job should be easier, and your team should feel bigger.

We approach each client and each project as an opportunity to build something that will truly resonate with learners. We ask your SMEs and L&D teams the right questions so we can deliver a solution that really works. You'll receive unparalleled accessibility, communication, and support throughout the entire project. No surprises: just a solution that works for you and grows with you.

---

Customized learning solutions that can scale to your company's business needs and match your brand and identity. We offer a variety of modalities including eLearning, ILT, AR/VR, video, and more.

One-stop shop backed by 20 years of industry knowledge and experience in both learning technology and learning experiences, including a variety of a-la-carte learning services.

Trusted partner that understands your business objectives and creates solutions that improve performance, close skills gaps, and generate business results. We work with you to establish key performance indicators and assess the effectiveness of your new solution.

Transparent, proven process to meet your timeline and goals. Quality assurance is built into every phase of our process to ensure that your learning strategy or project is designed and delivered to your standards.
